Work experienced

Company
Laigo

JOB DESCRIPTION

Become a member of a German high tech company that is changing the way we use Artificial Intelligence!

Join our dynamic team as a Python Developer and get the chance to work with a passionate and motivated team of engineers, to design, develop, and maintain backend services. If you're ready to excel in a collaborative environment, please apply now!

MANDATORY SKILLS

- **Experience in Python (3yrs+):** Strong expertise in Python programming, with the ability to design, develop, and maintain backend services and applications.
- **Backend Development:** Proven experience in developing and maintaining backend systems and services, including API design and implementation.
- **Microservices:** Well understanding of microservices architecture, design principles, and best practices. Ability to create, deploy, and manage microservices using Python.
- **Queueing Concepts:** Strong understanding of message queuing systems using RabbitMQ and their application in distributed systems.
- **Containerization:** Proficiency with containerization using Docker and container orchestration platforms such as Kubernetes. Experience in containerizing Python applications.
- **Container Orchestration:** Knowledge of container orchestration tools and principles, especially Kubernetes, for managing containerized applications and services.
- **Database Management:** Experience with database systems such as PostgreSQL and the ability to design and optimize database schemas for microservices.
- **DevOps:** Experience with DevOps practices, continuous integration, and continuous deployment (CI/CD) pipelines for deploying and managing microservices.

GOOD TO HAVE

- **Container Orchestration:** Knowledge of container orchestration tools and principles, especially Kubernetes, for managing containerized applications and services.
- **Queueing Concepts:** Strong understanding of message queuing systems using RabbitMQ and their application in distributed systems.
- **Elasticsearch:** proficiency in developing and maintaining efficient search and analytics solutions.
- **MLOps:** Basic understanding of MLOps (Machine Learning Operations) practices, including model deployment, monitoring, and automation.
- **Machine Learning:** Familiarity with machine learning concepts, libraries, and frameworks. Experience with integrating ML models into microservices is a plus.

BENEFITS

- **Continuous Learning:** We prioritize your professional development. You'll have access to our extensive learning platform, enabling you to stay up-to-date with industry trends and continuously enhance your skills.
- **Collaborative Team:** At Laigo, we foster a collaborative and welcoming work environment. You'll be part of a dynamic and cooperative team that values mutual respect and teamwork.
- **Flexibility:** We understand the importance of work-life balance. Enjoy the flexibility to manage your work hours, enabling you to maintain a harmonious equilibrium between your professional and personal life.
- **Travel Opportunities:** Laigo provides exciting opportunities for occasional travel to Germany.
- **Fitness and Well-being:** Your health matters to us, therefore, you'll receive a complimentary gym subscription to utilize most of the gyms in Skopje and not only.
- **Device of Choice:** Recognising that you have specific preferences, you'll have the freedom to choose the device that best suits your working style and efficiency.
