LAIGO

QA TESTER WANTED

Location	Start Date	Working Time	Entry as	Company
Skopje	**by agreement**	**Fulltime**	**Ideally work experienced**	**Laigo DOO**

JOB DESCRIPTION

You will be part of a dynamic team within an AI technology-focused environment where your contributions directly impact our growth.

RESPONSIBILITIES

- Develop and execute test cases, scripts, plans, and procedures for web applications and backend services.
- Collaborate closely with software developers, business analysts, product managers and product owners to understand project requirements and functionality.
- Identify, document, and track software defects and inconsistencies using bug tracking systems.
- Perform manual and automated testing to ensure software meets quality standards and adheres to functional requirements.
- Conduct regression testing, performance testing, and system integration testing.
- Analyze test results and provide detailed reports to inform product managers about the quality of the software.
- Participate in design and implementation reviews to provide input on functional requirements, product designs, schedules, or potential problems.
- Stay updated on industry best practices, testing methodologies, and technologies.

SKILLS AND QUALIFICATIONS:

- Bachelor's degree in Computer Science, Engineering, or related field (or equivalent work experience).
- Proven experience as a Software Tester or similar role, specifically testing web applications and backend systems.
- Solid understanding of software testing methodologies, tools, and processes.
- Experience with testing frameworks such as Selenium, PyTest, NUnit, or similar.
- Proficiency in scripting and automation using Python, .NET, or similar languages.
- Strong analytical and problem-solving skills with keen attention to detail.
- Excellent communication skills to collaborate effectively with cross-functional teams.
- Ability to work independently and as part of a team in a fast-paced environment.
- Familiarity with Agile methodologies is a plus, as well as the supporting Tools behind it.
- Experience with SQL databases and API testing is preferred.
